SUMMARY

Front-End Developer with 3.7 years of experience building scalable, high-performance web apps using React.js, Next.js, and TypeScript. Proficient in SSR, SSG, ISR, API integration, and image optimization. Skilled in translating UI/UX designs into responsive, user-friendly interfaces with a focus on performance and accessibility. Strong collaborator with cross-functional teams to deliver clean, maintainable code and seamless user experiences.

SKILLS

Front End Development Next.js, React.js, React Native, JavaScript, Bootstrap, TypeScript, JSON, React.js, Next.js, JavaScript (ES6+), React Hooks, Component Architecture, SQL
Styling & UI HTML5, CSS3, SCSS/SASS, Material-UI, Bootstrap, Tailwind CSS, Media Queries, Grid, Flexbox
Performance Optimization Netlify, Jenkins, Lazy Loading, Code Splitting, Webpack, Lighthouse Performance Audits
Project Management Tools Git, Github, Bitbucket, JIRA
Testing Tools Jest, React Testing Library
API Integration RESTful APIs, Axios, GraphQL
Agile & DevOps Scrum, Agile Methodology
Database SQL, PL/SQL

EXPERIENCE

Global React Developer

Aug '24 — Oct '24

MustFintech

Bengaluru, India

- Developed and enhanced the application using **Next.js** technology.
- Designed and integrated **role-based views** to deliver personalized user experiences based on permissions.
- Improved functionality and optimized code for better performance and maintainability.
- Contributed to refining the overall user experience by implementing advanced features and improvements.

Freelance Frontend Developer

Jun '24 — Jul '24

QilinLab Software PVT. LTD.

Bengaluru, India

- Giving training to junior developer and review their pull request.

Senior Front End Developer

Aug '23 — May '24

QilinLab Software PVT. LTD.

India (Remote)

- Contributed to the development of client-side web applications using React and other front end technologies. Worked with stakeholders to ensure high quality deliverables and positive user experience. Implemented responsive designs on multiple projects, resulting in a 30% increase in mobile traffic. Integrated APIs and designed RESTful services, resulting in efficient and streamlined workflows. Increased efficiency of development process by utilizing continuous integration tools and test automation frameworks. Provided technical leadership and mentorship to junior developers, resulting in successful onboarding and development.

Front End Developer

Oct '21 — Aug '23

QilinLab Software PVT. LTD.

Remote

- Contributed to frontend development projects, gaining hands-on experience with modern web technologies such as **HTML5, CSS3, JavaScript and Next JS**. Collaborated closely with senior developers to implement responsive and user-friendly interfaces, while also learning best practices for code organization, version control, and debugging.
- Assisted in the refinement of **user interfaces** and user experiences through iterative design improvements and usability testing. Leveraged industry-standard tools and methodologies to analyze user feedback and iterate on design solutions, gaining valuable insights into the iterative design process and the importance of user-centric design principles.

Frontend Intern

Feb '21 — Sep '21

QilinLab Software PVT. LTD.

Bengaluru, India

Developed high-performance, scalable web applications using React.js and Next.js, optimizing rendering speed by 30% through efficient component structuring and lazy loading.

PROJECTS

Eduley (Domain: EdTech / E-Learning), Bengaluru [Link](#)

Mar '21 — Present

- A Learning Management System (LMS) is a software application designed to facilitate the administration, documentation, tracking, reporting, and delivery of educational courses, training programs, or learning and development programs. Below is an outline of the key features and components typically found in an LMS type of application
- Implemented **dynamic menu handling** to tailor user interface experiences based on specific user roles, enhancing usability and security within the application.

- Integrated **Auth0 authentication system** to ensure robust user authentication and authorization, enhancing the overall security and user management capabilities of the application.
- Successfully integrated **Stripe payment system** to facilitate seamless and secure online transactions, ensuring a smooth and convenient payment experience for users while adhering to industry-leading security standards.
- Utilized **Jira Software** to effectively manage changes throughout the software development lifecycle. Leveraged Jira's robust features to track and prioritize change requests, assign tasks to team members, monitor progress, and ensure timely implementation. This streamlined approach enhanced collaboration, improved transparency, and facilitated seamless coordination among team members, resulting in efficient change management processes and successful project outcomes

Canco (Domain: Data Analytics / Dashboard), Benglore [Link](#)

- Designed and implemented custom dashboards tailored to the specific needs of users, providing intuitive data visualization and insights. These dashboards offer a centralized hub for monitoring key metrics, facilitating informed decision-making and enhancing overall productivity.

Marchem, Benglore

- Proficiently developed React Native mobile applications, specializing in implementing robust features and functionalities to meet client requirements and user needs.
- Demonstrated expertise in identifying and resolving bugs within mobile applications, ensuring optimal performance and user satisfaction. Additionally, continuously improved app functionalities to enhance user experience and meet evolving business needs.
- Collaborated closely with cross-functional teams, including designers and backend developers, to deliver seamless integration and optimal performance across various platforms.
- Implemented and maintained state management solutions using Redux, enhancing the scalability and maintainability of applications.
- React Native app for cross-platform compatibility on **IOS and Android**, ensuring seamless performance and user experience on both platforms.

Spends the Bit (Domain: Fintech), Benglore

- Spearheaded the development of a comprehensive user verification system dashboard, leveraging React and React Native to enhance security and streamline user authentication processes. Implemented real-time monitoring features and detailed analytics to empower administrators with actionable insights and facilitate proactive management of user verification processes. This initiative significantly bolstered system security, improved user experience, and fortified organizational compliance standards.
- Employed **Redux** for efficient global state management in complex web applications. Utilized Redux's centralized store and predictable state container to manage application-wide data, ensuring seamless communication between components and facilitating state synchronization across the entire application. Implemented Redux middleware for handling asynchronous actions and integrated Redux DevTools for debugging and monitoring state changes. This approach enhanced code maintainability, scalability, and testability, while providing a robust foundation for building scalable and maintainable applications.

VoiceMate (Domain: AI / Voice Automation / Communication), Benglore [Link](#)

- Automate calling system • Voice Mate is a multi-lingual conversational assistant that is both text and voice-based Enabled with Natural Language Understanding (NLU), the conversational assistant can create a script from Text to Speak based which can also be customized with human-like and contextual responses in multiple global languages In addition, Voice Mate is truly omni-channel, as it can be integrated with IVR, mobile, web, social & IoT channels
- Proficiently managed deep levels of **JSON** data and implemented complex JSON changes to optimize data structures and enhance application performance. Leveraged advanced JSON parsing techniques and libraries in languages like C# to efficiently manipulate and customize JSON objects according to specific project requirements. This expertise enabled seamless integration of JSON data into applications, ensuring scalability, flexibility, and optimal functionality.

Must Mate (Domain: Workforce Analytics / HRTech / Fintech), MustFintech [Link](#) Jul '24 — Oct '24 Seoul, Korea, Republic of

- Access data-driven workforce analytics dashboards for managers and employees, reducing disruptions and check-in meetings.
- All-in-one workforce management tool can help you manage time, productivity, payroll, and more

Msquare Market, MustFintech

- Msquare Market is a dynamic e-commerce platform designed for seamless online shopping, featuring a wide range of products and a user-friendly interface. I contributed to building scalable front-end components and optimized the overall user experience for high performance.

EDUCATION

Bachelor in Computer Application in Computer Application, S.R.K.G college sitamarhi

Jan '16 — Jan '19
Sitamarhi, India

- Sitamarhi, Bihar, India
